

PepsiCo Sustainability Center | ENGINEERING GREEN

Printed on 100% recycled content

300 S. RIVERSIDE PLAZA
SUITE 2302
CHICAGO, IL 60606

What looks like modern art is a rooftop wind turbine. Together with photovoltaic panels, they provide an on-site renewable energy source to the PepsiCo Sustainability Center, located in downtown Chicago.

As the chief engineering firm of the project, MEPC helped the facility win a **LEED® Platinum** rating, the highest accolade possible for environmentally sustainable building construction.

The 'LEED Certification Mark' is a registered trademark owned by the U.S. Green Building Council and is used by permission.

Learn more about the project at www.mepcinc.com
and let us show you the advantages of engineering green.
